

Santiago Guerrero

Software Developer

Profile

Summary Passionate about the software world, focused on quality and always looking for best practices. Experienced in different technologies and programming languages to create web systems and hybrid applications. In addition to some contributions to Open Source

Employment History

Software Developer at Freelance, Remote

January 2019 — December 2021

- Proficient in creating and deploying mobile applications using various frameworks and technologies to build high-performance, user-friendly apps. Experienced in developing and optimizing e-commerce platforms, focusing on seamless user experiences, secure transactions, and robust backend systems. Skilled in designing and implementing specialized software systems, including dental management systems and command-line interfaces (CLIs), tailored to meet specific business needs and improve operational efficiency.

Frontend Developer at VistaGeek, Remote

January 2020 — December 2020

- Developed a custom UI library that increased developer productivity and code reuse. Successfully led a team of frontend developers in building a comprehensive dental management system, overseeing project configuration, design implementation, and ensuring adherence to best practices and deadlines. Configured and managed the frontend project, including setting up development environments, integrating UI/UX designs, and ensuring seamless functionality and performance across various devices and browsers.

Full Stack Developer at Lifespikes, Remote

August 2021 — Present

- Worked on various contract-based projects utilizing technologies such as Laravel, React, and Tailwind CSS. Developed and maintained e-commerce platforms, lottery games, and other web applications, ensuring seamless integration between frontend and backend systems

Software Developer at OcmiWorkersComp

August 2022 — Present
